| | Coating | Cut Level | EN388 Ratings | Liner |
|---|---|---|---|---|
| **00-836** | Kyorene® Pro HCT Nano-Foam Nitrile Coating w/ touch screen capability | A3 | 4331 | 18g (100 denier) |
| **00-840** | Kyorene® Pro HCT MicroFoam Nitrile Coating | A4 | 4342 | 18g |
| **00-850** | Kyorene® Pro HCT MicroFoam Nitrile Coating | A5 | 4443 | 15g |
| **00-890** | Kyorene® Pro HCT MicroFoam Nitrile Coating w/ touch screen capability | A9 | 4X43 | 18g |

*Kyorene® is made from proprietary GRAPHENE based special fibers. Lightweight, comfortable, soft, flexible and extremely strong. Kyorene® is THE next generation material that will substanstially change and enhance the properties or hand protection as it is known today. GRAPHENE is a nano-sized carbon material that is the most important and leading edge material on earth and posseses inherent properties beyond imagination. The density of GRAPHENE is harder than a diamond, 200 times stronger than steel and is the strongest material ever measured in the world. It has outstanding thermal conductivity at 130 GPa and has a breaking tenacity that reaches 42N/m while the density is only 2.2g/cm.
